Dear Colleague :

Arrangements for the annual meeting in Quebec City have been completed and an outstanding programme is assured. There will be three morning scientific sessions from Monday through Wednesday.

The social arrangements include a welcoming cocktail party Sunday and a buffet supper with entertainment and dancing Monday evening. The annual banquet will be held Tuesday and a farewell luncheon will follow the scientific programme on Wednesday. Tours have been arranged each day to the City of Quebec, Orleans Island, Montmorency Falls and the Citadel, as well as a luncheon at Manoir St. Castin at Lac Beauport on Tuesday. For the gentlemen a tournament has been planned for Monday afternoon, at the Royal Quebec Golf Club, at Boischatel, an outstanding course, as well as a skeet tournament, Tuesday, at Valcartier.

Doctor W. E. Collins and his committee have arranged an interesting and unusual scientific programme. Guest speakers include Doctor R. G. Bunge, Professor of Urology, University of Iowa, College of Medicine; Doctor W. J. Poznanski, Head, Metabolism Research Laboratory, Ottawa Civic Hospital; Doctor J. Cukier, Associate Professor of Surgery, University of Paris and Doctor E. A. Tanagho, Associate Professor of Urology, University of California Medical Centre.

1. "OBSTRUCTION"
  2. "NEUROGENIC VESICAL DYSFUNCTION INCLUDING MANAGEMENT"
  3. "PRINCIPLES AND FUTURE"

Because of a number of inquiries, it was decided that scientific exhibits should be accepted for this meeting and probably for future scientific sessions, particularly in view of the increasing number of scientific papers which have had to be turned down due to inadequate space on our scientific programme. Although the time is late, exhibits for this year's meeting are solicited.

Your executive met in Montreal in January. The lack of urological topics at the annual meeting of the Royal College of Physicians and Surgeons of Canada was noted and the Committee to the Royal College was instructed to suggest the possibility of having one half morning devoted to urological papers. A notice was received from the Canadian Society for the Study of Fertility, that their annual meeting would immediately precede ours, being held June 18th to 20th at the Chateau Frontenac in Quebec. Members of the Canadian Urological Association are invited to attend.

In conclusion, it is hoped that as many members and their wives as possible will be coming to Quebec City. An unusual number of inquiries have been received from urologists outside Canada, indicating a large attendance. The various committees have worked hard to ensure an outstanding social and scientific programme for the annual meeting. We will look forward to seeing you at the Chateau Frontenac in June.
